Declaration under Rule 4.17:

— of inventorship (Rule 4.17(iv)) for US only

Published:

— with international search report
— before the expiration of the time limit for amending the
claims and to be republished in the event of receipt of
amendments

(88) Date of publication of the international search report:
16 March 2006

(15) Information about Correction:

Previous Correction:

see PCT Gazette No. 30/2004 of 22 July 2004, Section II

For two-letter codes and other abbreviations, refer to the "Guid-
ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: HYPOCRETIN ADMINISTRATION AS A TREATMENT FOR OBESITY

(57) Abstract: The invention provides compositions and methods for treatment and prophylaxis of weight disorders. Such methods entail administering to an individual a therapeutically or prophylactically effective dosage regime of a hypocretin or an agonist thereof, and monitoring the condition of the individual responsive to the administering.

WO 2004/019881 A3

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/27038

A. CLASSIFICATION OF SUBJECT MATTER

IPC(7) : A61K 38/00, 38/17

US CL : 514/12

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 514/12

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
Dialog, Pubmed, EAST

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	Haynes et al. 1999. Peptides 20:1099-1105. The reference teaches administration of orexin (synonym for hypocretin) is sufficient to induce wheel running.	1, 4 - 6, 14 - 19, 21, 25, 27 - 30, 36
X	Taheri S et al. 2001. Clinical Science (London) 101(2):17p. See abstract. The reference teaches administration of orexin (synonym for hypocretin) is sufficient to induce wheel running.	1,6,14-19,21,25,27-30, 36
A	Preti 2002. Current Opinion in Investigational Drugs 3:1199-1206. The reference teaches that hypocretins and orexins are identical, and that they increase feeding and thus would be expected to increase body weight. Claims are drawn to reduction of body weight by administration of the compounds, specification does not show reduction of weight.	1-36

☐ Further documents are listed in the continuation of Box C.

☐ See patent family annex.

* Special categories of cited documents:	
"A" document defining the general state of the art which is not considered to be of particular relevance	"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"E" earlier application or patent published on or after the international filing date	"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"O" document referring to an oral disclosure, use, exhibition or other means	"&" document member of the same patent family
"P" document published prior to the international filing date but later than the priority date claimed
